

MDP Fiori Usage Tracker

MDP Fiori Usage Tracker is an application designed to analyze and measure the usage of Fiori applications within businesses. With its powerful tracking capabilities and comprehensive reporting features, it provides valuable insights into the utilization of these applications, enabling businesses to make informed decisions and optimize their Fiori app ecosystem.

Fiori Usage Analytics

Whether you are a small business or a large enterprise, MDP Fiori Usage Tracker can help you unlock the full potential of your Fiori applications and take your business to the next level.

MDP Fiori Usage Tracker

MDP Fiori Usage Tracker provides businesses with reports on how their users interact with Fiori apps. These reports provide data on the frequency of app usage, availability of users in the apps. By tracking Fiori app usage, organizations can better understand user preferences, optimize Fiori systems and identify SAP Fiori opportunities.

Overall, MDP Fiori Usage Tracker enables businesses that want to track and measure the use of Fiori applications in their R/3 and SAP S/4HANA systems to assess the value and impact of the applications on their business processes.

- ✓ Number of application visits
